Innovation, excellence and customer commitment have been the basis of the exponential growth of "Cimenteira do Louro". Besides investing in technology, qualification of human resources and continuous product improvement, the company felt the need to manage and guarantee areas such as quality and the environment, becoming properly certified. We produce protecting. Our products are 100% recyclable and all the waste collected and reused, which made us the first company in the business to obtain Environmental Certification according to the NP EN ISO 14001 standard.

\_HAMMERED

COLOURS AVAILABLE

Simplicity with a hint of irreverence has a new name.  
 The **Marmobrick** line is as elegant and functional as others, but offers a unique versatility – the 100 x 410 mm pieces can be applied both horizontally and vertically, whenever the space wishes so, allowing this new floor to be easily adapted to the dynamics of any area.

This line allows you to choose between the sophistication of the polished finish and the rustic yet delicate roughness of the hammered finish. It is **available in 25 colours.** \_
